Flexible cable 1/75 S (75 vmtx type)

P/N: C291 055 076

APPLICATION NOTE

Due to its 75 ohms characteristic impedance, this cable is best suited for TV/Video applications.
The very small outer diameter and bending moment allow very easy routing during installation.
Its very light weight makes it perfect to be used in all miniature, space saving and dynamic applications.
Suitable for severe thermal conditions.

CONSTRUCTION / DIMENSIONS

Flexible cable 2/50 S (RG178 - KX21A)

P/N: C291 145 007 (MIL-C-17/93-RG178)

P/N: C291 145 017 (NF-C-93/550-KX21A)

APPLICATION NOTE

Due to its small diameter and its stranded inner conductor, RG 178 / KX21A is used for applications requiring high flexibility.

Its very low bending moment allows an easy routing during installation.

The insulation and jacket materials allow this cable to be used in severe thermal conditions.
