

75 OHM

The 75 ohm connectors shown on the following pages provide matched impedance for critical applications such as CATV or Telecom. The screw-on interface is similar in configuration to SMC, and the snap-on interface is similar in configuration to SMB. The cable attachment methods are the same as shown on page 3-5.

Standard cables for use with these connectors are shown at the bottom of the appropriate product pages. A complete listing of cable groups is provided on page 13-6. All the items shown are available with either gold or nickel-plated bodies; part numbers for each finish are shown on the product pages. The index listing shows the appropriate cable assembly instruction. Assembly instructions start on page 13-7.

Factory-built cable assemblies using these connectors are available from AEP.
