

[24E1 Coax to RJ45 Balun Panel](#)

Balun Panel 24 E1 Coax to RJ45

The 24 E1 Coax to RJ45 Balun Panel matches the impedance and signal characteristics of 48 unbalanced coax connections with 24 RJ45 / RJ48C balanced twisted pair connections. Available with your choice of BNC, 1.6/5.6 (Small Siemens) or Type43 (BT) coaxial connectors. The panel is 1U high and available with mounting kits for 19" and 23" racks. Panel mounting ears are reversible, allowing either the coax or the RJ45 / RJ48C connectors to be viewed as the front.

- 48 x Coax to 24 x RJ45
 - BNC to RJ45
 - 1.6/5.6 to RJ45
 - Type 43 to RJ45
- 75 ohm Unbalanced Coax to 120 ohm Balanced Twisted Pair
- Reversible 19" 1U Rack Mount
 - Coax or RJ45 to the front
- G703 and G704 compliant
